PREFACE

This Joint Photo Intelligence Report has been prepared by the Army and Navy, under Army chairmanship. It consists of a restudy of all electronic installations appearing on [REDACTED] photography of the USSR and the European Satellites, and has been accomplished because of the intelligence significance of such installations and the fact that they are often related to other military activities. In addition, it was believed that valuable additional information would be derived with improved techniques of exploitation resulting from the use of more sophisticated equipment and the experience gained by photo analysts.

PROCEDURE

This report uses all [REDACTED] missions covering the USSR and the European Satellites flown prior to [REDACTED]. The following procedure was used in its production:

1. A restudy was made of all electronic or suspected electronic installations and some unidentified items extracted from Mission Review Reports or Mission Coverage Summaries, except electronic items clearly related to airfields, AA fire-control radar and electric power facilities (such as transformer substations). However, many of the latter items were checked for possible misinterpretation. For instance, many electronic installations reported at airfields were checked to determine whether they had direct connection with that airfield. Also, many reported transformer stations were checked for possible misinterpretation.
2. After extraction of the electronic or suspected electronic items from the MRR's and the MCS's, each item was checked to determine whether it had been included in other reports. All detailed reports are included, but when detailed reports were not available, no effort was made to include more than one other report which mentioned the item. Therefore, the reports listed should not be considered the only reports covering those items. Also, no attempt was made to evaluate the accuracy or completeness of any report. In addition some detailed electronic reports were found which covered items not listed in the MRR's or MCS's. These items are included in a separate listing at the end of this report.
3. When it was determined that no detailed report had been written on an item, the prints (or duplicate positives) were drawn and the item was examined. If considered of sufficient importance to warrant possible further study, an electronic specialist was called in to examine the item and made a more authoritative interpretation. Nine items, eight of which are in Satellite nations, were found to be worthy of immediate study.
4. The following numerical system was used to evaluate the relative importance of items: 1 - possibly of immediate interest; 2 - probably of future interest; 3 - possibly of future interest; 4 - doubtfully of future interest; 5 - items other than electronics (such as oil derricks, lightning arrestors, etc.) It should be noted that this system is arbitrary and is based on the size, type, and location of the items as well as the potential for future exploitation due to scale and quality of photography.

MISSION	PRINTS	MRR	PAGE	COORDINATES	WAC	OTHER REPORTS	MRR DESCRIPTION	INTERPRETATION	EVALUATION
			4	50°42' 17°23'	232	None	Electronics installation with 3 towers.	Possible radio station with 3 lattice towers, 2 buildings, possible cooling facilities, no security (20 NM WNW of OPPELN, POLAND).	2
			4	46°23' 23°53'	251	None	Probable radio station with 5 tapering lattice masts arranged in right angle "V", opening toward NW- OCNA MURESULVI.	MRR description substantially correct. This is possibly a jamming station (20 NM SSE of CLUJ, RUMANIA).	1
			5	44°14' 28°36'			Probable radio station, 6 tapering lattice towers, each with a control building, CONSTANTA N.		
			3	46°11' 21°18'		AF DPIR 58-14 (2 RTS)	Radio station, 2 tapering lattice towers-ARAD.		
			5	47°09' 20°09'		None	Radio station, 1 tapering lattice tower- SZOLNOK, NW	MRR description substantially correct	4
			5	47°14' 19°12'	251	None	Possible electronics installation, 2 low masts or towers.	Large open area, 1 control building, 2 towers, 2 sets of 4 scars in square patterns possible "guys" for masts (not visible). Area possibly still under construction- (12 NM SSE of BUDAPEST, HUNGARY).	2
			6	47°22' 19°00'		None	Radio station, single mast, double tapering lattice-type tower, NW of SZIGETZENIMIKIOS.	MRR description substantially correct. Radio broadcast.	3
			6	47°25' 18°57'	252	None	Radio station, 9 masts, tapering lattice-type, TUSCULARUM N.	Probable curtain array, similar to area near SOFIA (5 NM SW of BUDAPEST, HUNGARY).	1

<u>MISSION</u>	<u>PRINTS</u>	<u>MRR</u>	<u>PAGE</u>	<u>COORDINATES</u>	<u>WAC</u>	<u>OTHER REPORTS</u>	<u>MRR DESCRIPTION</u>	<u>INTERPRETATION</u>	<u>EVALUATION</u>
			3	50°14' 13°16'	231	None	U/I objects SW CHOMOTOV arranged symmetrically- 4 large round objects and 13 smaller, connected by large cables or pathways (CZECHOSLOVAKIA).	Unable to identify through photography of collateral. Not missiles, probably not electronics. 4 large objects appear to be circular scar areas with possible buildings in form of "X" or cross. 8 of smaller areas appear to be similar to these. The pathways or cable scars are questionable. Further attempts at identification are being made.	2
			4	43°39' 22°37'		None	Possible small radio station.	Negative. One tall pole part-way down in gulley is anchor pole for junction point of power line.	4
			5	43°25' 24°37'		None	PLEVEN Complex with communications center 1 mile N.	Area with 1 building and 1 possible stick mast. No significant electronics visible.	4
			10	43°25' 24°44'	322	None	Radio station with 2 towers.	Standard broadcast, 2 vertical radiators (guyed) (5 NM E of PLEVEN; 75 NM NE SOFIYA, BULGARIA).	1
			10	43°14' 24°53'		None	Possible small radio station.	1 large building, single tall mast.	4
			13	43°12' 27°54'		None	STALIN (VARNA) Target Complex, including communications center.	Cloud cover and obliquity precludes interpretation (communications installations substantiated by collateral).	3
			13	43°23' 28°27'	323	None	Probable electronics installation, earth covered with mast on top.	U/I tower with 2 platforms and/or dishes-possible TV or microwave (Black Sea coast, 26 NM ENE of VARNA, BULGARIA).	2
